Education Driven to
Create a Safer
Workplace Today

Capabilities

In service since 2011, with an EMR rating less than 1; We have been inspecting fall protection anchors, davits and lifelines to meet OSHA and Lnl code. State & Federal code mandates that fall protection systems be inspected annually and recertified at intervals not to exceed 10 years. Our services include hydraulic load pull testing of anchors and davits plus engineered fall protection designs to ensure buildings meet and exceed safety regulations. We also have a team that focuses on high rise pressure washing of exterior facades, caulking and water proofing plus sealing or masonry/concrete.

Core Competencies

- OSHA, Labor & Industry & ANSI Safety Experts
- Fall Protection System Inspections and Analysis + Design
- 10 Year Anchor/Davit Load Pull Testing Recertification

Differentiators

- Owner has over 25 years in the safety industry.
- Every year, falls are one of the most common serious work-related injuries; GHB educates clients on how to create a safer workplace today.
- With an EMR rating less than 1, our safety records exceed industry standards.
- High rise equipment to scale buildings and offer exterior maintenance solutions which includes cleaning, caulking, water proofing.
- Experience with federal, state, local government contracts
- Leaders in the Safety Industry; consulting with Labor & Industries and state regulators.
